PRODUCT DESCRIPTION

CURA1 CAREGIVER RESET KEY – ALARM RESET AND PROGRAMMING TOOL FOR MONITORING SYSTEMS

The Cura1 Caregiver Reset Key is a compact, user-friendly device designed for caregivers and healthcare staff to easily manage and reset alarms on Cura1 monitoring equipment, including the Cura1 Falls Monitor. Whether you're working in aged care, hospitals, or supported accommodation, this tool streamlines alarm control and helps maintain a calm, responsive care environment.

This reset key not only silences alarms but also allows authorised personnel to program Cura1 equipment, giving greater flexibility and security across your monitoring systems. With a built-in keychain loop, it's designed to clip onto clothing or belts for quick access during busy shifts.

Key Features

- **Alarm Cancellation on Falls Monitors:** Quickly and efficiently reset alarms to maintain proper system functionality.
- **User-Friendly Operation:** Simple to use with minimal training required.
- **Lightweight & Portable:** Comfortable to carry throughout a shift; designed for daily use.
- **Programming Authorisation:** Enables secure programming of Cura1 devices by authorised staff only.
- **Keychain Attachment:** Easily clips onto clothing or belts for convenient access.
