GENIE LITE 24V 10AH LITHIUM BATTERY

SKU: GEN-1927

SPECIFICATIONS

- Battery Type: Lithium-ion
- Voltage: 24 V
- Capacity: 10 Ah
- Charging Method: On-board and Off-board Charging
- Charger Compatibility: Genie / compatible mobility scooter charger
- Approximate Range per Battery: Up to 15 km (depending on terrain and user weight)
- Airline Compliance: IATA compliant lithium battery (air travel approved)
- Battery Weight: Approx. 2–2.5 kg
- Colour: Black
- Compatibility: Genie Lite Mobility Scooter
- Use: Replacement or spare battery for extended travel

WARRANTY

12 Months

PRODUCT DESCRIPTION

Genie Lite 24V 10Ah Lithium Battery – Reliable Power for Mobility Scooters

The Genie Lite 24V 10Ah Lithium Battery is a dependable replacement or spare power source for compatible Genie mobility scooters. Lightweight and compact, it provides consistent performance, helping users maintain mobility and independence during everyday travel.

Built with modern lithium technology, the battery delivers efficient, long-lasting power for Genie scooters. Its lightweight construction makes handling simple, allowing users to easily remove, carry, and store the battery. This makes it ideal for extended trips or as a portable spare.

One of the key advantages of the Genie Lite Battery is its flexible charging options. It supports both on-board charging while installed in the scooter and off-board charging when removed. Users can charge the battery in whichever way suits their lifestyle and storage space, ensuring convenience and reliability.

With a 24V 10Ah capacity, the battery offers dependable energy for daily scooter use. When used as a spare, it can extend the total travel distance, giving users extra confidence and peace of mind during longer journeys.

This battery is compatible with the following Genie models:

- **Genie Lite T300 Lightweight Portable Scooter**
- **Genie Lite T330 Auto Folding Lightweight Scooter**
- **Genie UltraLight T580 Wheel Folding Travel Scooter**

Key Features

- 24V 10Ah lithium battery for Genie mobility scooters
- Lightweight and compact design for easy handling
- Supports on-board charging while installed
- Allows off-board charging when removed
- Reliable power for daily scooter use
- Ideal as a replacement or spare battery
- Compact size for convenient storage and transport

Why Choose the Genie Lite Battery
The Genie Lite Battery provides a practical and reliable power solution for mobility scooter users. Its lightweight lithium design ensures easy handling, and flexible charging options allow users to charge the battery either on or off the scooter. Using it as a spare battery can extend travel range and provide added peace of mind for longer trips.

Frequently Asked Questions

Which scooters are compatible with this battery?
The battery is suitable for Genie Lite mobility scooters and compatible Genie models, including T330, T300, and T580.

Can it be charged while in the scooter?
Yes. The battery supports on-board charging while installed.

Can the battery be removed for charging?
Yes. It also supports off-board charging for convenience.

Is this battery suitable as a spare?
Yes. Many users carry a spare to extend travel range during longer journeys.

What type of battery is it?
It is a 24V 10Ah lithium battery designed specifically for mobility scooter use.
