PRODUCT DESCRIPTION

The iCare Over Bed Pole is designed to help users get in and out of bed safely and independently. Its heavy-duty steel frame, combined with an H-frame base, supports a horizontal bar over the bed, allowing users to sit up, stand, or reposition themselves with confidence. Ideal for home care, hospitals, or nursing environments, this over bed pole enhances mobility while providing stability and support.

KEY FEATURES

- Height-Adjustable Handle: Fully adjustable to suit most users for optimal comfort and accessibility
- Non-Slip Cradle: Ensures secure grip while sitting up, standing, or repositioning
- Durable Construction: Heavy-duty steel frame with sturdy H-base for stability
- Compatible Design: Works with all iCare beds and most other beds
- Portable & Practical: Lightweight design allows easy movement within the room

EVERYDAY BENEFITS

The iCare Over Bed Pole supports independent movement in bed while reducing strain for both the user and caregiver. Its secure, non-slip handle and robust construction make it ideal for individuals with limited mobility, balance issues, or those recovering from surgery or injury. By providing stable support, it helps users reposition themselves safely and comfortably, whether at home or in a care setting.

WHY CHOOSE THE ICARE OVER BED POLE?

Choose the iCare Over Bed Pole for practical and safe bed mobility support. Its adjustable handle, non-slip design, and durable construction ensure reliable assistance for getting in and out of bed. Perfect for home care, hospitals, or nursing facilities, it enhances user independence while providing peace of mind for caregivers.
